

INSTRUCTIONS FOR HAND STUFFING BEARS

-  Use small amounts of stuffing and push them through the opening into the toy. Fill the arms and legs first. You can use the blunt end of a pencil, a wooden spoon or a similar blunt implement if necessary, but most children's hands are small enough to manage this on their own.
-  Once the arms and legs are stuffed to your satisfaction, you can stuff the body.
-  Cuddle your wishing star, make a special wish and put this into the body. Remember not to overstuff your animal – overstuffing makes your animal less squidgy and cuddly, and their new clothes won't hang so well!
-  When the animal is stuffed to your satisfaction, pull the cord tight, then knot together several times and tuck back inside the toy.
-  Remove the lint strip, where present, and close the velcro to finish off the toy.
-  Give your new friend a big cuddle, and make sure you mark their safe arrival by filling out a birth certificate.
